Reference Malibu Case Raleigh

I received a UPS package tracking number 1Z51708E0263740194 on 3/6/2015 from JRaleigh. The package contained a power supply and one Western Digital external 2TB My Book HDD (hard disk drive) serial number 574D415A4139303734343136. The Western Digital My Book HDD was connected to a Tableau TD3 forensic device for imaging. A forensically sound image was created of the Western Digital 2TB HDD. The following is the log file created by the TD3 device.

The image files were later loaded into EnCase forensic software that verified the files with no errors. Once loaded into EnCase software it was found that the hard drive contained a FileVault2 encrypted volume. In order to read the encrypted volume I connected the Western Digital 2TB HDD back to the Tableau TD3 device and made a RAW copy of the HDD onto a 3TB wiped HDD thus making a clone of the original HDD. The clone HDD was connected to a Tableau T35u USB3 write blocker which was then connected to my MacBook Pro forensic computer. Once I connected the cloned HDD, I was prompted to enter the password to unlock the encrypted volume "JR Backup". I entered the password "dontbeafuckingprickman15423" which was provided to me by J. Raleigh. The encrypted volume was then unlocked thus revealing the contents. Using BlackLight forensic software I processed the contents of the drive and was able to view the folder structure. The folder structure revealed the drive was used as a "backup drive" aka "Time Machine" and contained 72 backup folders dated from 2013-12-18 to 2015-03-04 which filled the 2TB drive. The below screen captures show the backups in 2014 occurred on average 3-4 times a month. In 2015 that continued until the month of March 2015 when 24 backups were performed including 16 on the day the drive was shipped to my office for analysis on 3/4/2015 at 6:20PM according to UPS Tracking's first scan entry.

The screen capture below is not from this case, but is included to illustrate and show what the “Time Machine” program looks like when clicked on. The Time Machine keeps all the backups performed until the disk is full. Once the disk is full “The oldest backups are deleted when your disk becomes full.”

A search was conducted on the drive for evidence of Malibu Medias copyrighted works and BitTorrent use. The search was negative for Malibu's movies, but positive for BitTorrent files. The following is a list of Torrent files located on the drive. Many of the located Torrent files are the same but appear in different backup folders.
